

# Digital Property Law – General Discussion

The following is an outline that summarizes related topics foundational to digital property, digital property law, virtual property and virtual real estate under the umbrella of the virtual global nation model. This outline of factors that contribute to the building of digital property law and its relationship to digital safe haven policies, digital property rights, the digital property framework, digital title, and the integration of intellectual property.

## **Definition of Digital Property Law:**

Digital property law deals with the rights associated with digital spaces, collaborative canvases, virtual real estate and or any space that supports multiple simultaneous users that have the capability to change, edit, mark-up, comment on, or make any change to the space. Digital property law deals with the rights of spaces as opposed to the form of information as in intellectual property. Digital property may contain intellectual property and therefore deals with the integration, attachment, placement or access to intellectual property within digital spaces.

### **New Model of interaction**

- Spaces
- Networks
- Platform
- Collaborative canvas

### **Digital Property**

- Introduction
- General Discussion
- Interrelationship with governance model

### **Model of Mind and Property Rights**

- Discussion of exclusiveness, and non-biological mind theory
- Discussion of identity
- Biological mind model
- Premise of energy, personal, and work
- Real and unreal discussion
- Rational Data what is it?
- Information

## **General Definitions**

1. Intellectual property – definition
  - Applicable areas – patents, copyrights, virtual property other than virtual real estate
2. Virtual Real Estate
3. Rights associated with, rights of the space
  - Individual rights
  - Community rights
  - Adjudication
    - a. Types of conflict
    - b. Process and type

## **Application of rules in different types of spaces**

- General discussion
- Specific metrics

## **Types of virtual spaces**

- Game
- Social Network
- Purpose driven networks
- KR spaces

## **Necessity of property law**

- Stability of governance model
- Stability of property law
- Aggregation of wealth and capital and property law

## **Theories of Property**

- Lockean theory
- Utilitarian theory
  - Existential rights
  - Greater good
  - Individual and group
- Personality theory

### **Descriptive Languages for defining rights**

- DRDL

### **Current Protection**

- GNU
- Creative Commons

### **Virtual world and real world interface (Rational Data Network)**

- RWT – real world trading
- Valuation
- Enforceability
- Real world consequence
- Degrees of realness
- Degrees of virtual reality
- The value of Safety
- Transferability and real world jurisdictions
- 3<sup>rd</sup> party issues
- Efficacy of information
- Local and global effects – consequences

### **Revenue and Network Model**

- Terms of revenue generation
- Corporate entity

### **Outside Threats**

- Hackers
- System failure
- Infrastructure failure
- Data compromise
- Responsibility of provider
- Shared responsibility model

### **Property Rights and “Rights Bundles”**

- Aggregation of rights
- Resale of rights

### **Investment Mechanisms and Digital Property (Rational Data Network)**

- Definition of property
- Management
- Vehicles for investment
- Investment network

### **Property Descriptions**

- Meets and bounds descriptions
- Transference to real world metrics
- Purpose driven spaces
- Exclusivity vs. Inclusivity
- Public Rights

### **Personal Property**

- Avatars
- Vehicles
- Representational rights
- Insult or injury of representation

## **Governance Model**

### **Descriptive documents**

- General introduction (Peace and Plenitude)
- Consciousness Studies, Transformation and Change
- EULA
- Rights Document
- Constitution

### **Existential rights (defined)**

- Rights of existence
- Rights document
- Constitution
- Interface between Virtual Global Nation (VGN) and Real world rights
- Voting
- Action
- Projects
- Privacy

### **Rights document**

- Rights to own property
- Rights to free speech
- Rights to access information
- Right to privacy
- Transparency
- Accountability

### **Constitution**

- Descriptive how to of self governance

### **The Actionable Path**

- Self-determination
- Self-emancipation
- RDN –what its about
- RW –Discovery
- The synergistic purposes

## **Institutions and Governance Model**

- General Charter of Institutions
- Virtual Institutions and definition
- Institutions Purpose
- Institutions Charter
- Virtual world and real world institution interface
- Virtual world and real world integrations
- Rights and jurisdictional qualities of VW and RW integrations
